**OBJECTIVE:**

- To study and understand the concepts of statistical methods and queuing theory and its applications

**UNIT I ONE DIMENSIONAL RANDOM VARIABLE 9+3**

Random variables - Probability function – moments – moment generating functions and their properties – Binomial, Poisson, Geometric, Uniform, Exponential, Gamma and Normal distributions – Function of a Random Variable.

**UNIT II ESTIMATION THEORY 9+3**

Unbiased Estimators – Method of Moments – Maximum Likelihood Estimation - Curve fitting by Principle of least squares – Regression Lines.

**UNIT III TESTING OF HYPOTHESES 9+3**

Sampling distributions - Type I and Type II errors - Tests based on Normal, t,  $\chi^2$  and F distributions for testing of mean, variance and proportions – Tests for Independence of attributes and Goodness of fit.

**UNIT IV DESIGN OF EXPERIMENTS 9+3**

Analysis of variance – One-way and two-way classifications – Completely randomized design – Randomized block design – Latin square design.

**UNIT V QUEUEING MODELS 9+3**

Poisson Process – Markovian queues – Single and Multi Server Models – Little's formula Machine Interference Model – Steady State analysis – Self Service queue.

**TOTAL (L: 45+T: 15) : 60 PERIODS**

**OBJECTIVE:**

- To study and understand the properties of recent materials used in construction.

**UNIT I SPECIAL CONCRETES 10**

Concretes, Behaviour of concretes - High Strength and High Performance Concrete – Fibre Reinforced Concrete, Self compacting concrete, Alternate Materials to concrete

<b>UNIT II</b>	<b>METALS</b>	<b>10</b>
Steels - New Alloy Steels – Aluminum and its Products –Coatings to reinforcement – Applications.		
<b>UNIT III</b>	<b>COMPOSITES</b>	<b>10</b>
Plastics –Reinforced Polymers – FRP – Applications		
<b>UNIT IV</b>	<b>OTHER MATERIALS</b>	<b>10</b>
Water Proofing Compounds – Non-weathering Materials – Flooring and Facade Materials		
<b>UNIT V</b>	<b>SMART AND INTELLIGENT MATERIALS</b>	<b>5</b>
Smart and Intelligent Materials for intelligent buildings - Special features

<b>CN 9202</b>	<b>CONSTRUCTION EQUIPMENT</b>	<b>L T P C</b>
		<b>3 0 0 3</b>

**OBJECTIVE:**

- To study and understand the various types of equipment and its applications in construction project

<b>UNIT I</b>	<b>CONSTRUCTION EQUIPMENT MANAGEMENT</b>	<b>10</b>
Identification – Planning - Equipment Management in Projects - Maintenance Management – Replacement - Cost Control of Equipment - Depreciation Analysis – Safety Management		
<b>UNIT II</b>	<b>EQUIPMENT FOR EARTHWORK</b>	<b>10</b>
Fundamentals of Earth Work Operations - Earth Moving Operations - Types of Earth Work Equipment - Tractors, Motor Graders, Scrapers, Front end Waders, Earth Movers		
<b>UNIT III</b>	<b>OTHER CONSTRUCTION EQUIPMENTS</b>	<b>10</b>
Equipment for Dredging, Trenching, Tunneling, Drilling, Blasting - Equipment for Compaction - Erection Equipment - Types of pumps used in Construction - Equipment for Dewatering and Grouting – Foundation and Pile Driving Equipment –Equipment for Demolition.		

**UNIT IV MATERIALS HANDLING EQUIPMENT 5**  
Forklifts and related equipment - Portable Material Bins – Conveyors - Hauling Equipment

**UNIT V EQUIPMENT FOR PRODUCTION OF AGGREGATE AND CONCRETING 10**  
Crushers – Feeders - Screening Equipment - Handling Equipment - Batching and Mixing Equipment - Hauling, Pouring and Pumping Equipment – Transporters

**TOTAL: 45 PERIODS**

**CN 9221 ADVANCED CONSTRUCTION TECHNIQUES L T P C  
3 0 0 3**

**OBJECTIVE:**

- To study and understand the latest construction techniques applied to engineering Construction

**UNIT I SUB STRUCTURE CONSTRUCTION 15**  
Box jacking - pipe jacking - Under water construction of diaphragm walls and basement - Tunneling techniques - piling techniques - driving well and caisson - sinking cofferdam - cable anchoring and grouting - driving diaphragm walls, sheet piles - laying operations for built up offshore system - shoring for deep cutting - large reservoir construction - well points - dewatering and stand by plant equipment for underground open excavation.

**UNIT II SUPER STRUCTURE CONSTRUCTION FOR BUILDINGS 10**  
Vacuum dewatering of concrete flooring – concrete paving technology – techniques of construction for continuous concreting operation in tall buildings of various shapes and varying sections – launching techniques – suspended form work – erection techniques of tall structures, large span structures – launching techniques for heavy decks – insitu prestressing in high rise structures, aerial transporting handling erecting lightweight components on tall structures.

**UNIT III CONSTRUCTION OF SPECIAL STRUCTURES 10**  
Erection of lattice towers and rigging of transmission line structures – construction sequence in cooling towers, silos, chimney, sky scrapers, bow string bridges, cable stayed bridges – launching and pushing of box decks – Advanced construction techniques for offshore structures – construction sequence and methods in domes and prestress domes – support structure for heavy equipment and conveyor and machinery in heavy industries – erection of articulated structures, braced domes and space decks.

**UNIT IV REHABILITATION TECHNIQUES 6**  
Mud jacking grout through slab foundation - micropiling for strengthening floor and shallow profile - pipeline laying - protecting sheet piles, screw anchors - sub grade water proofing, underpinning, crack stabilization techniques.

**UNIT V DEMOLITION****4**

Advanced techniques and sequence in demolition and dismantling.

**TOTAL: 45 PERIODS****REFERENCES:**

**CN 9222****CONTRACT LAWS AND REGULATIONS****L T P C  
3 0 0 3****OBJECTIVE:**

- To study the various types of construction contracts and their legal aspects and provisions

**UNIT I CONSTRUCTION CONTRACTS 10**

Indian Contracts Act – Elements of Contracts – Types of Contracts – Features – Suitability – Design of Contract Documents – International Contract Document – Standard Contract Document – Law of Torts

**UNIT II TENDERS 10**

Prequalification – Bidding – Accepting – Evaluation of Tender from Technical, Contractual and Commercial Points of View – Contract Formation and Interpretation – Potential Contractual Problems – World Bank Procedures and Guidelines – Tamilnadu Transparency in Tenders Act.

**UNIT III ARBITRATION 5**

Comparison of Actions and Laws – Agreements – Subject Matter – Violations – Appointment of Arbitrators – Conditions of Arbitration – Powers and Duties of Arbitrator – Rules of Evidence – Enforcement of Award – Costs

**UNIT IV LEGAL REQUIREMENTS 10**

Insurance and Bonding – Laws Governing Sale, Purchase and Use of Urban and Rural Land – Land Revenue Codes – Tax Laws – Income Tax, Sales Tax, Excise and Custom Duties and their Influence on Construction Costs – Legal Requirements for Planning – Property Law – Agency Law – Local Government Laws for Approval – Statutory Regulations

**UNIT V LABOUR REGULATIONS 10**

Social Security – Welfare Legislation – Laws relating to Wages, Bonus and Industrial Disputes, Labour Administration – Insurance and Safety Regulations – Workmen's Compensation Act – Indian Factory Act – Tamilnadu Factory Act – Child Labour Act – Other Labour Laws

**TOTAL: 45 PERIODS**

**CN 9223 CONSTRUCTION PLANNING, SCHEDULING AND CONTROL L T P C  
3 0 0 3**

## **OBJECTIVE:**

- To study and understand the concept of scheduling and the techniques necessary for construction project

### **UNIT I CONSTRUCTION PLANNING 9**

Basic Concepts in the Development of Construction Plans - Choice of Technology and Construction Method - Defining Work Tasks - Defining Precedence Relationships among Activities - Estimating Activity Durations - Estimating Resource Requirements for Work Activities - Coding Systems

### **UNIT II SCHEDULING PROCEDURES AND TECHNIQUES 9**

Construction Schedules - Critical Path Method – Scheduling Calculations - Float - Presenting Project Schedules - Scheduling for Activity-on-Arrow and with Leads, Lags, and Windows - Scheduling with Resource Constraints and Precedences - Use of Advanced Scheduling Techniques - Scheduling with Uncertain Durations - Calculations for Monte Carlo Schedule Simulation - Crashing and Time/Cost Tradeoffs - Improving the Scheduling Process.

### **UNIT III COST CONTROL, MONITORING AND ACCOUNTING 9**

The Cost Control Problem - The Project Budget - Forecasting for Activity Cost Control - Financial Accounting Systems and Cost Accounts - Control of Project Cash Flows - Schedule Control - Schedule and Budget Updates - Relating Cost and Schedule Information.

### **UNIT IV QUALITY CONTROL AND SAFETY DURING CONSTRUCTION 9**

Quality and Safety Concerns in Construction - Organizing for Quality and Safety - Work and Material Specifications - Total Quality Control - Quality Control by Statistical Methods - Statistical Quality Control with Sampling by Attributes - Statistical Quality Control with Sampling by Variables - Safety

### **UNIT V ORGANIZATION AND USE OF PROJECT INFORMATION 9**

Types of Project Information - Accuracy and Use of Information - Computerized Organization and Use of Information - Organizing Information in Databases - Relational Model of Databases - Other Conceptual Models of Databases - Centralized Database Management Systems - Databases and Applications Programs - Information Transfer and Flow.

**TOTAL: 45 PERIODS**

**CN 9203****PROJECT FORMULATIONS AND APPRAISAL****L T P C  
3 0 0 3****OBJECTIVE:**

- To study and understand the formulation, costing of construction projects and techniques of project appraisal.

**UNIT I PROJECT FORMULATION 10**

Project – Concepts – Capital investments - Generation and Screening of Project Ideas - Project identification – Preliminary Analysis, Market, Technical, Financial, Economic and Ecological - Pre-Feasibility Report and its Clearance, Project Estimates and Techno-Economic Feasibility Report, Detailed Project Report – Different Project Clearances required

**UNIT II PROJECT COSTING 10**

Project Cash Flows – Time Value of Money – Cost of Capital

**UNIT III PROJECT APPRAISAL 15**

NPV – BCR – IRR – ARR – Urgency – Pay Back Period – Assessment of Various Methods – Indian Practice of Investment Appraisal – International Practice of Appraisal – Analysis of Risk – Different Methods – Selection of a Project and Risk Analysis in Practice

**UNIT IV PROJECT FINANCING 5**

Project Financing – Means of Finance – Financial Institutions – Special Schemes – Key Financial Indicators - Ratios

**UNIT V PRIVATE SECTOR PARTICIPATION 5**

Private sector participation in Infrastructure Development Projects - BOT, BOLT, BOOT - Technology Transfer and Foreign Collaboration - Scope of Technology Transfer

**TOTAL: 45 PERIODS****REFERENCES:**

**CN 9224 COMPUTER APPLICATIONS IN CONSTRUCTION  
ENGINEERING AND PLANNING**

**L T P C  
2 0 2 3**

**OBJECTIVE:**

- To study and understand the hardware and software requirements of computer, programming and scheduling techniques applied to construction engineering

**UNIT I INTRODUCTION 9**

Introduction to System Hardware – Languages – Feasibility study and analysis – procurement, training, implementation and system management – procedural language - developing application with spread sheet -developing application with files and database software.

**UNIT II OPTIMIZATION TECHNIQUES 9**

Linear, Dynamic and Integer Programming - Branch and Bound Techniques – Application to Production Scheduling, Equipment Replacement, Material Transportation and Work Assignment Problems – Software applications

**UNIT III INVENTORY MODELS 9**

Deterministic and Probabilistic Inventory Models - Software applications

**UNIT IV SCHEDULING APPLICATION 9**

PERT and CPM - Advanced planning and scheduling concepts – Computer applications – case study.

**UNIT V OTHER PROBLEMS 9**

Estimating – project planning and scheduling- accounting and cost engineering – Enterprises – Introduction to ERP systems - operations simulation

**TOTAL: 45 PERIODS**

**REFERENCES:**

**CN 9225 ADVANCED CONSTRUCTION ENGINEERING AND  
COMPUTING TECHNIQUES LABORATORY**

**L T P C  
0 0 4 2**

**(A) ADVANCED CONSTRUCTION ENGINEERING LABORATORY**

**OBJECTIVE:**

- This course provides a thorough knowledge of material selection through the material testing based on specification.

**LIST OF EXPERIMENTS**

- Mix design of concrete as per IS, ACI & BS methods for high performance concrete.
- Flow Characteristics of Self Compacting concrete
- Effect of minerals and chemical admixtures in concrete at fresh and hardened state with relevance to workability, strength and durability.
- NDT on hardened concrete - UPV, Rebound hammer and core test.
- Permeability tests on hardened concrete

**TOTAL: 30 PERIODS**

### **LIST OF EQUIPMENTS REQUIREMENTS:**

1. Concrete making equipments.
2. Equipments for self- compacting concrete.
3. Workability and slump equipments for HPC & SCC.
4. Equipments for compression testing with very high precision with automated graph
5. NDT equipments - UPV, rebound hammer, core cutting machine (electrically operated)
6. Permeability apparatus
7. Oven (Range 0 to 600 degree C)

### **(B) ADVANCED COMPUTING TECHNIQUES LABORATORY**

#### **OBJECTIVE:**

1. This course gives an exposure to students in utilizing the sophisticated Spread sheets programs, Estimation Software and other package programs

#### **LIST OF EXPERIMENTS:**

1. Quantity takeoff, Preparation and delivery of the bid or proposal of an engineering construction project.
2. Design of a simple equipment information system for a construction project.
3. Scheduling of a small construction project using Primavera scheduling systems including reports and tracking.
4. Scheduling of a small construction project using tools like MS project scheduling systems including reports and tracking.
5. Simulation models for project risk analysis.

**TOTAL: 30 PERIODS**

### **LIST OF EQUIPMENTS / SOFTWARES / TOOLS REQUIREMENTS**

1. MS OFFICE
2. QE PRO
3. MS OFFICE SUIT
4. PRIMAVERA POWER USER
5. PRIMAVERA CONTRACTOR STANDARD
6. PERT MASTER
7. PRIMAVERA MONTE CARLO SIMULATION
8. PRIMAVERA EXPEDITION

**CN 9251**

**ADVANCED CONCRETE TECHNOLOGIES**

**L T P C**

**3 0 0 3**

#### **OBJECTIVE:**

- To study the properties of materials, tests and mix design for concrete.

#### **UNIT I CONCRETE MAKING MATERIALS**

**9**

Aggregates classification, IS Specifications, Properties, Grading, Methods of combining aggregates, specified gradings, Testing of aggregates. Cement, Grade of cement, Chemical composition, Testing of concrete, Hydration of cement, Structure of hydrated cement, special cements. Water Chemical admixtures, Mineral admixture.

#### **UNIT II CONCRETE**

**9**

Properties of fresh concrete, Hardened concrete, Strength, Elastic properties, Creep and shrinkage, Variability of concrete strength, durability of concrete.

<b>UNIT III</b>	<b>MIX DESIGN</b>	<b>9</b>
Principles of concrete mix design, Methods of concrete mix design, Testing of Concrete. Statistical quality control- sampling and acceptance criteria.		
<b>UNIT IV</b>	<b>SPECIAL CONCRETE</b>	<b>9</b>
Light weight concrete, Fly ash concrete, Fibre reinforced concrete, Sulphur impregnated concrete, Polymer Concrete, Super plasticised concrete, hyper plasticized concrete, Epoxy resins and screeds for rehabilitation - properties and applications - high performance concrete. High performance fiber reinforced concrete, self-compacting-concrete.		
<b>UNIT V</b>	<b>CONCRETING METHODS</b>	<b>9</b>
Process of manufacturing of concrete, methods of transportation, placing and curing. Extreme weather concreting, special concreting methods. Vacuum dewatering - underwater concrete, special form work.		

**TOTAL : 45 PERIODS**

**REFERENCES:**

1. Neville, A.M., Properties of Concrete, Prentice Hall, 1995, London.
2. Shetty M.S., Concrete Technology, S.Chand and Company Ltd. Delhi, 2003.
3. A.R.Santhakumar ;"Concrete Technology",Oxford University Press,2007.

<b>CN 9252</b>	<b>SHORING, SCAFFOLDING AND FORMWORK</b>	<b>L T P C</b>
		<b>3 0 0 3</b>

**OBJECTIVE:**

- To study and understand the various types of scaffolding, formworks, shoring methods and techniques

**UNIT I PLANNING AND SITE EQUIPMENT & PLANT FOR FORM WORK 9**

At Tender stage – Development of basic system – Planning for maximum reuse – Economical form construction – Planning examples – Crane size, effective scheduling estimate – Recheck plan details – Detailing the forms.

Overall Planning – detail planning – Standard units – Corner units – Schedule for column formwork – Formwork elements – Planning Crane arrangements – Site layout plan – Transporting plant – Formwork beams – Formwork ties – Wales and ties – scaffold frames from accessories – Vertical transport table form work.

**UNIT II FORM MATERIALS 9**

Lumber – Types – Finish – Sheathing boards working stresses – Repetitive member stress – Plywood – Types and grades – Textured surfaces and strength – Reconstituted wood – Steel – Aluminum Form lining materials – Hardware and fasteners – Nails in Plywood

Concrete density – Height of discharge – Temperature – Rates of Placing – Consistency of concrete – Live loads and wind pressure – Vibration Hydrostatic pressure and pressure distribution – Examples – Vertical loads - Uplift on shores – Adjustment for non standard conditions.

**UNIT III DESIGN OF FORMS AND SHORES 9**

Basic simplification – Beam formulas – Allowable stresses – Deflection bending lateral stability – Shear, Bearing – Examples in wall forms – Slab forms – Beam forms – Ties, Anchors and Hangers – Column forms – Examples in each.

Simple wood stresses – Slenderness ratio – Allowable load – Tubular steel shores patented shores – Site Preparation, Size and spacing – Steel Tower Frames – Safety practices – Horizontal shores shoring for multistories – More concentrated shore loads T- heads – Tow Tier wood shores – Ellis shores – Dayton sure grip and Baker Roofs shores – Safeway Symons shores – Beaver – advance shores Dead shore – Raking and Flying shores.

**UNIT IV FORMWORK FOR BUILDINGS 9**

Location of job mill – Storage – Equipment – Footings – Wall footings – Column footings Sloped footing forms – Curb and gutter forms – Wall forms – Prefabricated panel systems – Giant forms curved wall forms – Column heads – Beam or girder forms – Beam pockets – Suspended forms – Concrete joint construction – Flying system forms.

Causes of failures – Inadequate shoring inadequate bracing of members – improper vibration – Premature stripping – Errors in design – Failure to follow codes – How formwork affects concretes quality – ACI – Case studies – Finish of exposed concrete design deficiencies – Safety factors – Prevention of rotation – Stripping sequence – Advantages of reshoring.

**UNIT V FORMS FOR DOMES AND TUNNELS, SLIP FORMS AND SAFETY PRACTICES FOR SCAFFOLDS 9**

Hemispherical, Parabolic, Translational typical barrel vaults, Hyperbolic Folded plates – Shell form design considerations loads – Inserts , Anchors bolts – Building the forms- Placing concrete – Form removed – Strength requirements – Tunnel forming components – Curb forms invert forms – Arch forms – Concrete placement methods – Cut and cover construction – Tolerances – Form construction – Shafts.

Slip Forms - Principles – Types – advantages – Functions of various components – Planning – Desirable characteristics of concrete – Common problems faced – Safety in slip forms special structures built with slip form Technique – Codal provisions - Types of scaffolds – Putlog and independent scaffold – Single pole scaffolds – Fixing ties – Spacing of ties plan – bracing – knots – safety net – General safety requirements – precautions against particular hazards – Truss suspended – Gantry and system scaffolds.

**TOTAL: 45 PERIODS**

**CN 9253 SYSTEM INTEGRATION IN CONSTRUCTION L T P C  
3 0 0 3**

**OBJECTIVE:**

- To study and understand the construction system integration

**UNIT I STRUCTURAL INTEGRATION 9**

Structural System, Systems for enclosing Buildings, Functional aesthetic system, Materials Selection and Specification.

<b>UNIT II</b>	<b>ENVIRONMENTAL FACTORS</b>	<b>9</b>
Qualities of enclosure necessary to maintain a specified level of interior environmental quality – weather resistance – Thermal infiltration – Acoustic Control – Transmission reduction – Air quality – illumination – Relevant systems integration with structural systems.		
<b>UNIT III</b>	<b>SERVICES</b>	<b>9</b>
Plumbing – Electricity – Vertical circulation and their interaction - HVAC		
<b>UNIT IV</b>	<b>MAINTENANCE</b>	<b>9</b>
Component longevity in terms of operation performance and resistance to deleterious forces - Planning systems for least maintenance materials and construction – access for maintenance – Feasibility for replacement of damaged components – equal life elemental design – maintenance free exposed and finished surfaces.		
<b>UNIT V</b>	<b>SAFETY</b>	<b>9</b>
Ability of systems to protect fire – Preventive systems – fire escape system design – Planning for pollution free construction environmental – Hazard free Construction execution.		

**TOTAL: 45 PERIODS**

<b>CN 9254</b>	<b>ENERGY CONSERVATION TECHNIQUES IN BUILDING CONSTRUCTION</b>	<b>L T P C 3 0 0 3</b>
----------------	--	----------------------------

**OBJECTIVE:**

- To study the various energy saving and management techniques applied to building and construction with relevance to environment

<b>UNIT I</b>	<b>INTRODUCTION</b>	<b>6</b>
Fundamentals of energy- Energy Production Systems-Heating, Ventilating and Air-conditioning – Solar Energy and Conservation – Energy Economic Analysis – Energy conservation and audits – Domestic energy consumption – savings - challenges – primary energy use in buildings - Residential – Commercial – Institutional and public buildings – Legal requirements for conservation of fuel and power in buildings.		
<b>UNIT II</b>	<b>ENVIRONMENTAL</b>	<b>7</b>
Energy and resource conservation – Design of green buildings – Evaluation tools for building energy – Embodied and operating energy – Peak demand – Comfort and Indoor Air quality – Visual and acoustical quality – Land, water and materials - Airborne emissions and waste management.		

**UNIT III DESIGN 8**  
Natural building design consideration – Energy efficient design strategies – Contextual factors – Longevity and process Assessment – Renewable Energy Sources and design – Advanced building Technologies – Smart buildings – Economies and cost analysis.

**UNIT IV SERVICES 12**  
Energy in building design – Energy efficient and environment friendly building – Thermal phenomena – thermal comfort – Indoor Air quality – Climate, sun and Solar radiation, - Psychometrics – passive heating and cooling systems - Energy Analysis – Active HVAC systems - Preliminary Investigation – Goals and policies – Energy audit – Types of Energy audit – Analysis of results – Energy flow diagram – Energy consumption / Unit Production – Identification of wastage- Priority of conservative measures – Maintenance of energy management programme.

**UNIT V ENERGY MANAGEMENT 12**  
Energy management of electrical equipment - Improvement of power factor – Management of maximum demand – Energy savings in pumps – Fans – Compressed air systems – Energy savings in Lighting systems – Air conditioning systems – Applications – Facility operation and maintenance – Facility modifications – Energy recovery dehumidifier – Waster heat recovery – Steam plants and distribution systems – Improvement of boiler efficiency – Frequency of blow down – Steam leakage – steam Flash and condense return.

**CN 9255 CONSTRUCTION OF PAVEMENTS LT PC  
3 0 0 3**

**OBJECTIVE:**

- To study the properties of flexible and rigid pavement

**UNIT I ROAD MAKING MATERIALS FOR FLEXIBLE AND RIGID PAVEMENTS 9**

Classification, testing and applications of road making aggregates – Road binders – Bitumen - Cement

**UNIT II PROPERTIES OF BITUMINOUS MIXTURES 10**

Resistance of bituminous mixtures to permanent deformation – Flexibility and brittleness - Common mechanical tests – Permeability characteristics – Weathering of bituminous road surfacing – Adhesion of bituminous binders to road aggregates – Effect of aggregate size in bituminous courses – Temperature susceptibility of bituminous courses – Design of bituminous mixes.

**UNIT III PROPERTIES OF PAVEMENT QUALITY CONCRETE MIXURES AND CONSTRUCTION PRACTICE 11**

Properties of fresh and hardened concrete – laboratory tests – Design of concrete mixes for Pavement Quality Concrete.

Construction of various layers in rigid and flexible pavements – Quality assurance during construction – sampling and analysis.

**UNIT IV MACHINERIES 8**  
Road making machineries – Road formation, bituminous constructions - Road surface evaluation

**UNIT V LATEST ADVANCEMENTS 7**  
Methods to improve bitumen quality – Rheological and chemical additives – Polymer modified bitumen – Super pave concepts – Recycling of bituminous courses – Smart materials for cement concrete pavement – Use of admixtures and fibres.

**TOTAL: 45 PERIODS**

**CN 9256 CONSTRUCTION PROJECT MANAGEMENT L T P C**  
**3 0 0 3**

**OBJECTIVE:**

- To study the various management techniques for successful completion of construction project

**UNIT I THE OWNERS' PERSPECTIVE 9**  
Introduction - Project Life Cycle - Types of Construction - Selection of Professional Services - Construction Contractors - Financing of Constructed Facilities - Legal and Regulatory Requirements - Changing Environment of the Construction Industry - Role of Project Managers

**UNIT II ORGANIZING FOR PROJECT MANAGEMENT 9**  
Project Management – modern trends - Strategic Planning - Effects of Project Risks on Organization - Organization of Project Participants -Traditional Designer-Constructor Sequence - Professional Construction Management - Owner-Builder Operation - Turnkey Operation - Leadership and Motivation for the Project Team

**UNIT III DESIGN AND CONSTRUCTION PROCESS 9**  
Design and Construction as an Integrated System - Innovation and Technological Feasibility - Innovation and Economic Feasibility - Design Methodology - Functional Design - Construction Site Environment

**UNIT IV LABOUR, MATERIAL AND EQUIPMENT UTILIZATION 9**  
Historical Perspective - Labour Productivity - Factors Affecting Job-Site Productivity - Labour Relations in Construction - Problems in Collective Bargaining - Materials Management - Material Procurement and Delivery - Inventory Control - Tradeoffs of Costs in Materials Management. - Construction Equipment - Choice of Equipment and Standard Production Rates - Construction Processes Queues and Resource Bottlenecks

**UNIT V COST ESTIMATION 9**  
 Costs Associated with Constructed Facilities - Approaches to Cost Estimation - Type of Construction Cost Estimates - Effects of Scale on Construction Cost - Unit Cost Method of Estimation - Methods for Allocation of Joint Costs - Historical Cost Data - Cost Indices - Applications of Cost Indices to Estimating - Estimate Based on Engineer's List of Quantities - Estimation of Operating Costs.

**CN 9257 QUANTITATIVE TECHNIQUES IN MANAGEMENT L T P C  
 3 0 0 3**

**OBJECTIVE:**

- To study the various quantitative methods applied to the elements of management

**UNIT I OPERATIONS RESEARCH 12**  
 Introduction to Operations Research - Linear Programming – Graphical and Simplex Methods, Duality and Post – Optimality Analysis – Transportation and Assignment Problems

**UNIT II PRODUCTION MANAGEMENT 12**  
 Inventory Control - EOQ - Quantity Discounts - Safety Stock – Replacement Theory – PERT and CPM – Simulation Models – Quality Control

**UNIT III FINANCIAL MANAGEMENT 7**  
 Working Capital Management – Compound Interest and Present Value methods – Discounted Cash Flow Techniques – Capital Budgeting

**UNIT IV DECISION THEORY 7**  
 Decision Theory – Decision Rules – Decision making under conditions of certainty, risk and uncertainty – Decision trees – Utility Theory

**UNIT V MANAGERIAL ECONOMICS 7**  
 Cost Concepts – Break-even analysis – Pricing Techniques – Game theory Applications

**TOTAL: 45 PERIODS**

5. Hamdy A.Taha, Operations Research: An Introduction, Prentice Hall, 2002.

**OBJECTIVE:**

- To study the various aspects of manpower management in construction

**UNIT I                      MANPOWER PLANNING                      10**

Manpower Planning, Organising, Staffing, directing, and controlling – Personnel Principles

**UNIT II                      ORGANISATION                      10**

Organisation – Span of Control – Organisation Charts – Staffing Plan - Development and Operation of human resources - Managerial Staffing – Recruitment – Selection - Placement, Training and Development.

**UNIT III                      HUMAN BEHAVIOUR                      10**

Introduction to the field of people management - basic individual psychology; motivation - Job design and performance management - Managing groups at work - self-managing work teams - intergroup behaviour and conflict in organisations – Leadership - Behavioural aspects of decision-making; and communication for people management

**UNIT IV                      WELFARE MEASURES                      5**

Compensation – Safety and health – GPF – EPF – Group Insurance – Housing - Pension – Laws related to welfare measures.

**UNIT V                      MANAGEMENT AND DEVELOPMENT METHODS                      10**

Compensation - Wages and Salary, Employee Benefits, employee appraisal and assessment - Employee services - Safety and Health – Discipline and discharge - Special Human resource problems, Performance appraisal. - Employee hand book and personnel manual - Job descriptions and organization structure and human relations – Productivity of Human resources.

**TOTAL: 45 PERIODS**

**REFERENCES:**

5. Dwivedi R.S, Human Relations and Organisational Behaviour, Macmillian India Ltd.,2005.

**OBJECTIVE:**

- To study the role and methods of economics and finance concepts applied to construction business.

**UNIT I                      ECONOMICS                      10**

Role of Civil Engineering in Industrial Development – Advances in Civil Engineering - Engineering Economics – Support Matters of Economy related to Engineering – Market demand and supply – Choice of Technology – Quality Audit in economic law of returns governing production.

**UNIT II CONSTRUCTION ECONOMICS 10**

Construction development in Housing, transport energy and other infrastructures – Economics of ecology, environment, energy resources – Local material selection – Form and functional designs – Construction workers – Urban Problems – Poverty – Migration – Unemployment – Pollution.

**UNIT III FINANCING 13**

The need for financial management - Types of financing – Financing instruments– short term borrowing – Long term borrowing – Leasing – Equity financing – Internal generation of funds – External commercial borrowings – Assistance from government budgeting support and international finance corporations – Analysis of financial statements – Balance Sheet - Profit and Loss account – Cash flow and Fund flow analysis – Ratio analysis – Investment and financing decision – Financial Control - centralized management.

**UNIT IV ACCOUNTING METHOD 6**

General Overview – Cash basis of a accounting – Accrual basis of accounting – Percentage completion method – Completed contract method – Accounting for tax reporting purposes and financial reporting purposes – Accounting Standards

**UNIT V LENDING TO CONTRACTORS 6**

Loans to Contractors – Interim construction financing – Security and risk aspects.

**CN 9260 QUALITY CONTROL AND ASSURANCE IN CONSTRUCTION L T P C  
3 0 0 3**

**OBJECTIVE:**

- To study the concepts of quality and assurance and control techniques in construction

**UNIT I QUALITY MANAGEMENT 9**

Introduction – Definitions and objectives – Factor influencing construction quality - Responsibilities and authority - Quality plan - Quality Management Guidelines – Quality circles.

**UNIT II QUALITY SYSTEMS 9**

Introduction - Quality system standard – ISO 9000 family of standards – Requirements – Preparing Quality System Documents – Quality related training – Implementing a Quality system – Third party Certification.

**UNIT III            QUALITY PLANNING****9**

Quality Policy, Objectives and methods in Construction industry - Consumers satisfaction, Ergonomics - Time of Completion - Statistical tolerance – Taguchi's concept of quality – Codes and Standards – Documents – Contract and construction programming – Inspection procedures - Processes and products – Total QA / QC programme and cost implication.

**UNIT IV            QUALITY ASSURANCE AND CONTROL****9**

Objectives - Regularity agent, owner, design, contract and construction oriented objectives, methods - Techniques and needs of QA/QC - Different aspects of quality - Appraisals, Factors influencing construction quality - Critical, major failure aspects and failure mode analysis, -Stability methods and tools, optimum design - Reliability testing, reliability coefficient and reliability prediction.

**UNIT V            QULAIITY IMPROVEMENT TECHNIQUES****9**

Selection of new materials - Influence of drawings, detailing, specification, standardization - Bid preparation - Construction activity, environmental safety, social and environmental factors - Natural causes and speed of construction - Life cycle costing - Value engineering and value analysis.

**TOTAL: 45 PERIODS****REFERENCES:**

**CN 9261****RESOURCE MANAGEMENT AND CONTROL  
IN CONSTRUCTION****L T P C  
3 0 0 3****OBJECTIVE:**

- To study the management of various resources involved in construction

**UNIT I            RESOURCE PLANNING****10**

Resource Planning, Procurement, Identification, Personnel, Planning for material, Labour, time schedule and cost control, Types of resources, manpower, Equipment, Material, Money, Time.

**UNIT II            LABOUR MANAGEMENT****5**

Systems approach, Characteristics of resources, Utilization, measurement of actual resources required, Tools for measurement of resources, Labour, Classes of Labour, Cost of Labour, Labour schedule, optimum use Labour.

**UNIT III MATERIALS AND EQUIPMENT 10**

Material: Time of purchase, quantity of material, sources, Transportation, Delivery and Distribution.

Equipment: Planning and selecting by optimistic choice with respect to cost, Time, Source and handling.

**UNIT IV TIME MANAGEMENT 10**

Personnel time, Management and planning, managing time on the project, forecasting the future, Critical path measuring the changes and their effects - Cash flow and cost control

**UNIT V RESOURCE ALLOCATION AND LEVELLING 10**

Time-cost trade off, Computer application - resource leveling, resource list, resource allocation, Resource loading, Cumulative cost - Value Management.

**TOTAL: 45 PERIODS**

**REFERENCES:**

**CN 9262**

**PROJECT SAFETY MANAGEMENT**

**L T P C  
3 0 0 3**

**OBJECTIVE:**

- To study and understand the various safety concepts, requirements applied to construction projects

**UNIT I CONSTRUCTION ACCIDENTS 10**

Accidents and their Causes – Human Factors in Construction Safety - Costs of Construction Injuries – Occupational and Safety Hazard Assessment – Legal Implications

**UNIT II SAFETY PROGRAMMES 10**

Problem Areas in Construction Safety – Elements of an Effective Safety Programme – Job-Site Safety Assessment – Safety Meetings – Safety Incentives

**UNIT III CONTRACTUAL OBLIGATIONS 5**

Safety in Construction Contracts – Substance Abuse – Safety Record Keeping

**UNIT IV DESIGNING FOR SAFETY 15**

Safety Culture – Safe Workers – Safety and First Line Supervisors – Safety and Middle Managers – Top Management Practices, Company Activities and Safety – Safety Personnel – Sub contractual Obligation – Project Coordination and Safety Procedures – Workers Compensation

**UNIT V OWNER'S AND DESIGNER'S OUTLOOK 5**

Owner's responsibility for safety – Owner preparedness – Role of designer in ensuing safety – Safety clause in design document.

**TOTAL: 45 PERIODS**

**CN 9263****MANAGEMENT INFORMATION SYSTEM****L T P C****3 0 0 3****OBJECTIVE:**

- To study the concepts of information systems and their general applications

**UNIT I INTRODUCTION 7**

Information Systems - Establishing the Framework - Business Models - Information System Architecture - Evolution of Information Systems.

**UNIT II SYSTEM DEVELOPMENT 8**

Modern Information System - System Development Life Cycle - Structured Methodologies - Designing Computer Based Methods, Procedures, Control - Designing Structured Programs.

**UNIT III INFORMATION SYSTEMS 10**

Integrated Construction Management Information System - Project Management Information System - Functional Areas, Finance, Marketing, Production, Personnel - Levels, DSS, EIS, and ES - Comparison, Concepts and Knowledge Representation - Managing International Information System.

**UNIT IV IMPLEMENTATION AND CONTROL 10**

Control - Testing Security - Coding Techniques - Defection of Error - Validating - Cost Benefit Analysis - Assessing the value and risk of Information System.

**UNIT V SYSTEM AUDIT 10**

Software Engineering qualities - Design, Production, Service, Software specification, Software Metrics, Software quality assurance - Systems Methodology - Objectives - Time and Logic, Knowledge and Human Dimension - Software life cycle models - Verification and Validation.

**TOTAL: 45 PERIODS****REFERENCES:**

**OBJECTIVE:**

To study the design of energy efficient buildings which balances all aspects of energy, lighting, space conditioning and ventilation by providing a mix of passive solar design strategies and to learn the use of materials with low embodied energy.

**UNIT I INTRODUCTION 9**

Energy required for building construction - Heat Transfer – Measuring Conduction – Thermal Storage – Measurement of Radiation – The Green house Effect – Psychrometry Chart – Measuring latent and sensible heat. Thermal Comfort – Site Planning and Development – Temperature – Humidity – Wind – Optimum Site Locations – Sun Protection – Types of Shading Devices – Conservation – Heating and Cooling loads.

**UNIT II PASSIVE SOLAR HEATING AND COOLING 9**

General Principles of passive Solar Heating – Key Design Elements - Direct gain Trombe Walls, Water Walls, Convective Air loops – Concepts – Case Studies – General Principles of Passive Cooling – Ventilation – Predicting ventilation in buildings – window ventilation calculations - Radiation – Evaporation and dehumidification – Mass Effect – Load Control – Air Filtration and odor removal – Heat Recovery in large buildings

**UNIT III DAYLIGHTING AND ELECTRICAL LIGHTING 9**

Materials, components and details - Insulation – Optical materials – Radiant Barriers Glazing materials - Daylighting – Sources and concepts – Building Design Strategies – Case Studies – Electric Lighting –Light Distribution – Electric Lighting control for daylighted buildings – Illumination requirement – Components of Daylight factor – Recommended Daylight factors – Daylighting analysis – Supplementary Artificial Lighting Design

**UNIT IV HEAT CONTROL AND VENTILATION 9**

Requirements – Heat transmission through building sections – Thermal performance of Building sections – Orientation of buildings – Building characteristics for various climates – Thermal Design of buildings Influence of Design Parameters – Mechanical controls – Examples. Ventilation – Requirements – Minimum standards for ventilation – Ventilation Design – Energy Conservation in Ventilating systems – Design for Natural Ventilation.

**UNIT V DESIGN FOR CLIMATIC ZONES 9**

Energy efficiency – an overview of design concepts and architectural interventions – Energy efficient buildings for various zones – cold and cloudy – cold and sunny – composite – hot and dry – moderate – warm and humid – case studies of residences, office buildings and other buildings in each zones – Energy Audit - Certification

**TOTAL: 45 PERIODS**
